

TIC TAC TOE JavaScript

Giovani da Silva

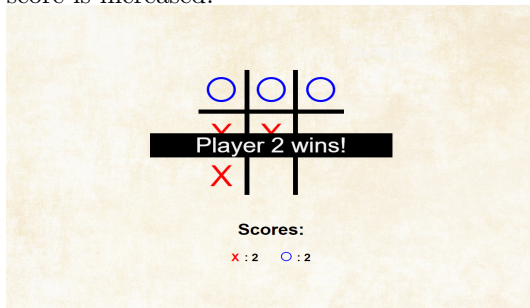

July 20,2020

1 Resume

The goal of this application is to make a simple javascript tic tac toe game. There are 2 options: Play against the "machine" (randomized choices) or against another player(in the same cpu).

Every time a row, column, or diagonal line matches the correspondent user score is increased.

More about documentation or code explanation are in the script.js itself
